

## Attachments for 7 East Town Street COA Application

We request permission to secure a licensed electrician to REPLACE the outside ELECTRIC SERVICE CABLE with new PVC pipe. We are updating our panel from 100 to 200. Rob Harris, NPU, has requested that we put a meter outside as well. This would be on the Scotland Road side of the house (photo).

This a picture of metersocket, specs are 6" depth, 21" long, 13.75 wide, both metersocket and pvc pipe are gray and both can be painted to match house.
